

# HUMANAV

MORE THAN VEHICLE TRACKING 

POWERED BY

**NOVACOM**  
SERVICES

# JOIN THE NETWORK

## THE HUMANAV COMMUNITY

HumaNav is a vehicle tracking solution (VTS) launched in 2006 in collaboration with UNITAR and CNES (the French space agency) to facilitate the tracking of assets belonging to humanitarian organizations. HumaNav aims at improving daily fleet management; it can be also a useful tool in case of security issues.

HumaNav users see themselves as a community. We meet regularly to share field experience and best practices. The group strengthens every year welcoming large organizations and NGOs. HumaNav users benefit from our network of local agents across the world facilitating devices installation and maintenance.

## CORE SERVICES

- Definition of your VTS project, technical and financial
- Deployment and system commissioning, in country (retrofit) or during vehicle preparation (stock pile)
- Training program: ICT, security officer, fleet manager and driver
- Multilingual technical support via phone or mail, open Monday to Friday 8 AM to 5 PM (UTC+1)
- After-sales services
- Technical updates, new features and possible evolutions
- Application hosting for your data: 99,5% service continuity and 100% confidentiality

## EXTENDED SERVICES

- Stock pile support and in-country retrofit
- Made to measure SLA (Service Level Agreement)
- Bespoke software/hardware
- 24/7 warning in case of system outage
- Training program on VTS installation
- Access to our unique inter-organization capability: The HumaNetwork

efficiency

environment

security

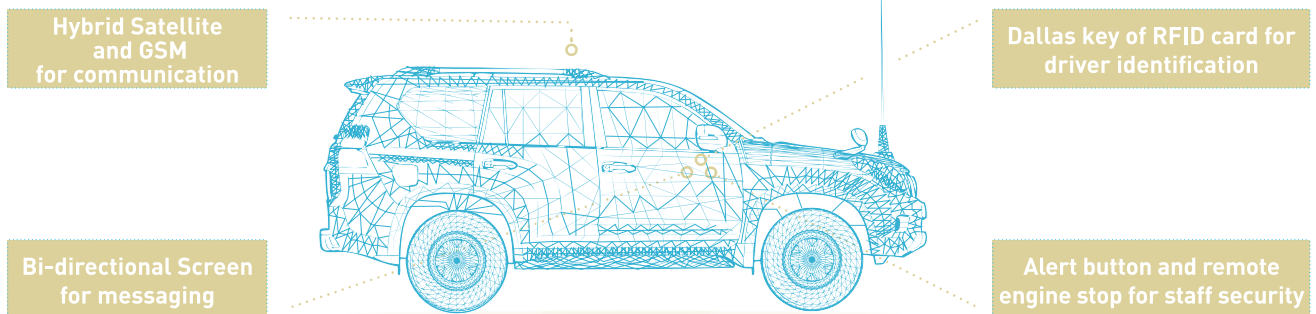

safety

# TRACK, MANAGE & COMMUNICATE

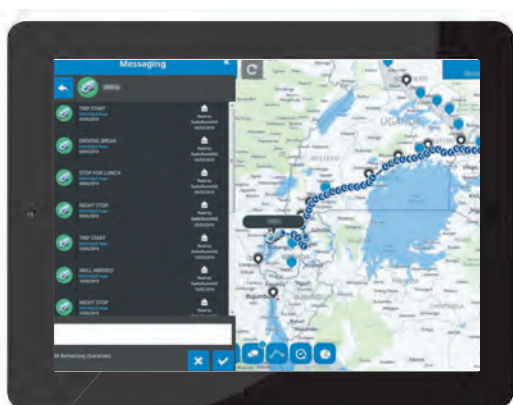

## ON BOARD EQUIPMENT: DISCRETE AND RELIABLE

## WEB APPLICATION

Novacom Services provides you with the HumaNav web application: user-friendly, complete and powerful. All you need is a simple Internet access.

- Route monitoring
- Real-time tracking
- Dedicated map: POI (point of interest), zones, geofencing
- Global view on worldwide operations
- Customized surveillances and alerts (overspeeding, night drive, forbidden areas,...) sent by Email or SMS
- Nearest vehicle search
- Two way communication with the tracked asset using an onboard screen option
- Activity reports: driving time, utilization ratio, night drive, eco-driving, overspeeding, fuel usage, ...
- Regular updates of the web application

## ON GOING R&D

- Sat voice
- Intra convoy communication
- Personal trackers
- Small assets tracking

# OUR EXPERTISE

## WE HELP YOU IMPROVE PROGRAM DELIVERY

## BENEFITS

- Control expenses: mileage, fuel, resell cost, fleet size
- Improve program delivery: mission completion, driver behavior
- Help to protect staff with SOS button and on board screen messaging
- Improve the reputation of your organization
